

Patient 101: Lesson 1

Small Steps.
Big Progress.
A Healthier You!

The Skill Gap

Knowledge. Preparation. Confidence.
Better Care.

Empowering Health Together

Feeling lost is
NOT your fault!

Difficulty navigating
care is a learnable
skill gap, not a
personal failure.
Let's shift from
self-blame to
organized preparation.

The 3-Problem Prep Grid

Your doctor can't fix ten things in one visit, but they can fix three.
Use this grid to focus on what matters most today.

1 Problem 1

Main Concern
(The reason for your visit)

Symptoms & Details
(What you have noticed, in one short sentence)

Questions
(What you want to ask)

Next Steps
(What you hope to leave with)

2 Problem 2

Main Concern
(The reason for your visit)

Symptoms & Details
(What you have noticed, in one short sentence)

Questions
(What you want to ask)

Next Steps
(What you hope to leave with)

3 Problem 3

Main Concern
(The reason for your visit)

Symptoms & Details
(What you have noticed, in one short sentence)

Questions
(What you want to ask)

Next Steps
(What you hope to leave with)

Prepared patients have
better visits,
clearer answers,
and healthier
tomorrows.

The Care Cycle

Advocacy is a cycle, not a checklist.

Before the Visit
(Preparation)

- Get organized
- Write down your top 3
- Bring your information
- Be ready to ask

During the Visit
(Participation)

- Share your top 3
- Ask questions
- Take notes
- Make a plan together

After the Visit
(Follow-up)

- Review your plan
- Take next steps
- Keep track
- Reach out if needed

Same
Team.
Better
Care.

Knowledge
today.
Healthier
tomorrow.

Patient 101 does not replace your provider —
it helps strengthen the patient-provider relationship.
