

Patient 101 ❤️
Lesson 2:

The Top 3 Rule.

Focus Today. Brighter Care Tomorrow. 
Choose. Share. Make Progress.

You know
your health best.
Let's make the
most of your visit! 

Scribble Space.

Write down everything on your mind — symptoms, worries, questions, updates, medications, test results, or anything else. No filtering. Just get it all out.

[illegible]

It's okay if it's a long list.
This is your space. ❤️

Rank It Down to Three.

What's Most Important Today?

Look at your list and choose the 3 things you want to focus on at today's visit.

- 1 _____
- 2 _____
- 3 _____

Tip: Choose the things that are most important, latest, or most bothersome to you.

Say It Out Loud!

You can even use this script:

"My top three today are:

1. _____
2. _____
3. _____

This helps your provider focus, gives you the best care, and keeps you in control of your health journey. ❤️

The Rest Counts Too! ♥

The rest doesn't vanish —
it goes to next time.
The list is yours. ❤️

Keep it for your next visit, a follow-up message, or to discuss at another appointment.
